Padlock range

British designed
high security
padlocks

Meet your security needs with our best-in-class high security padlocks which are compatible with both our keyMASTER and keyPRIME patented master key solutions. The padlock range utilises an interchangeable cylinder core, making upgrading security between multiple padlock profiles a quick and easy process. Tested and certified to the latest EN 12320 standard ranging from security levels 4 to 6.

Made from solid hardened steel shackles and bodies which provides resistance to physical attack methods such as cutting, sawing and impact blows. The base features an anti-drill base plate that protects the cylinder from manipulation or a core attack, making the range suitable for different external applications.

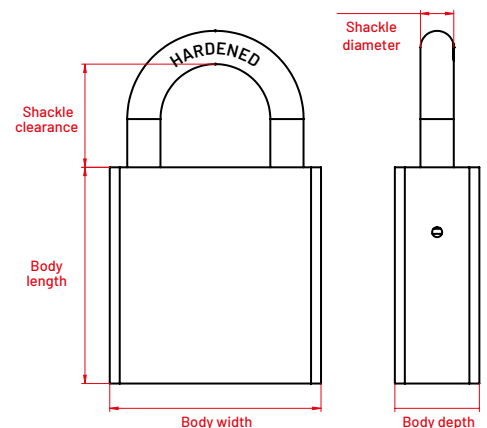

Ideal applications

Isolated locations where security and robustness is a priority, haulage container security for containers during shipping/transit, agricultural applications, and any other commercial and residential applications that require security.

Padlock	Shackle diameter	Shackle clearance	Body width	Body length	Body depth
Grade 4 open shackle padlock	10mm	31mm	63mm	65mm	25.4mm
Grade 4 container padlock	10mm	14mm	67mm	63.5mm	25.4mm
Grade 5 open shackle padlock	12.9mm	40mm	80mm	84mm	30mm
Grade 5 container padlock	12mm	18mm	80mm	70mm	30mm
Grade 6 closed shackle padlock	12.9mm	40mm	80mm	130mm	30mm

Part code structure

Brand	Mk Pass Differ	Grade	Shackle	Steel / Brass	Open, Closed, Long, Container	Platform
J	M	6	13	S	CN	DT
Y	P	5	12		O	KM
	-	4	10	B	C	KU
		3	08		LS	KP
						6P

Example part codes

410 Range	Open/Long shackle & container padlock	JM410SLS-KM
512 Range	Container padlock	J-512SCN-6P
513 Range	Open	JM513SO-KU
613 Range	Closed Shackle	JM613SC-KM
